# Introduction

CatEarth bears the idea of building strong community which stays together and grow. We are not the meme coin. Our dream is to provide utility for use in real world. The road is far, but we so ambitious.

Our coin not just any other coin. Your get reward for holding it and sooner or later. You will able to use as currency on our platform and other places too.

# What is Blockchain?

A blockchain is a distributed database that is shared among the nodes of a computer network. As a database, a blockchain stores information electronically in digital format. Blockchains are best known for their crucial role in cryptocurrency systems, such as bitcoin, for maintaining a secure and decentralized record of transactions. The innovation with a blockchain is that it guarantees the fidelity and security of a record of data and generates trust without the need for a trusted third party.

# Features

## **Pinksale Anti-bot**

Most coins get Pump and Dump by Bots, after that it is hard to survive as the coin holders lose confidence in such coin. But we are secured with pinksale AntiBot, At launch on PanCakeSale our Antibot will be active and this mechanism won't allow to buy/sell to snipping bots.

## **2% Rewards**

The holders of the CatEarth coin will receive rewards in BUSD. We will also share profit-sharing site earnings with holders.

# **Up to 9Years Locked**

78.83% CatEarth coins are Locked on Pinksale & every year 9% coins are distributed in P2E Games and marketing. The road of catearth is long and full of excitement.

## **9Years Liquidity**

Pancakesale is a decentralized platform for the exchange of different cryptocurrencies. CatEarth coin liquidity on pancakesale locked for 9years.

## **Renounce Contract**

After Presale we will renounce the contract. Renouncing the Contract means we won't be able to change TX fees and other details in the contract. So it will be totally rug pull free in the future.

# Utility of Coins

Profit Sharing Sites

P2E

NFT

# Profit Sharing Sites

We will launch sites to promote CatEarth coin. One of sites will be the “Coin Listing Site”. On these sites, users can add their coins and vote for different coins.

There are so many big listing sites, but we have a big community and new ideas. Will definitely concur and raise above in competition. Our main aim is to have a clean and good community. We also aim to spread the word about CatEarth.

As this is a coin site listing there will be a big opportunity for coin creators to advertise. Advertisers can buy ads with CatEarth with discounts. 80% of earnings of this site shared with CatEarth holders and the remaining 20% will be transferred to the marketing fund for future promotions and development.

There will be more sites and you will be surprised.

# Video Games

The evolution of the video game industry has consistently created innovative business models. From a humble beginning of buying cartridges at GameStop, the industry evolved into “free-to-play” business models, such as Fortnite and Warzone where players gain access for free and later buy in-game items.

Today, we are witnessing the next natural evolution to “incentivized gaming” models that are proving to be successful. As history suggests, blockchain-based NFTs are the future of gaming and we intend to be a part of this evolution. People are starting to realize the monetary value of their time and this trend of allowing players to monetize their playtime will inevitably replace traditional gaming models.

To build something that lasts, teams have to be focused on what’s coming next. The world is rapidly entering a digitalization era where improvements occur at lightning speed. With four billion people having internet access worldwide, people are spending more time searching the internet for lucrative opportunities to make a living online. Our vision is to help create the engaging virtual economies that make these opportunities possible.

CateEarth game will not entertain you but also you can earn Catearth coins while playing. It will be a wonderful opportunity to play and earn at the same time.

As our blockchain game releasing next year, we will also be going to launch a promotional android game, which will give us more visibility and more opportunity of getting more people into our CatEarth community.

# What is NFT

Mostly known as NFT, "Non-Fungible Token" is a non-fungible asset that is unique and cannot be split. NFT can be connected to real-world objects. NFT provides the owner of the native digital assets (assets only exist in or originate from the digital world) with proof of ownership, which can live outside of a centralized server or repository.

In Economics, fungible assets refer to assets such as currencies, stocks, bonds and precious metals. Fungible assets are divisible and interchangeable. Assets of the same nominal value and attributes can be considered the same. In this sense, they are more of a symbol and assets themselves don't carry much value. Non-fungible assets, such as houses, cars, furniture, artwork, data assets and the vast majority of other assets, are neither divisible nor interchangeable. It's rather obvious that most assets in the real world are non-fungible, such as artwork, video game items and IDs.

Digital art generally refers to artistic work created using digital technology. Unlike traditional artwork, digital art is more flexible when it comes to the form of expression. The original carrier of digital art is data. As the carrier of digital art, data can be easily replicated and spread but lacks asset property. This leads to the biggest difference between digital art and traditional art business models: when it comes to 3 traditional fine art, one can trade the actual artwork, whereas it is difficult to trade the physical digital artwork.

The way in which digital artworks are distributed also leads to copyright issues, as the copyright information is easily lost in the process of dissemination.

Sometimes users and art lovers can't find the proper way to pay for artwork when they want to. Moreover, digital artworks are circulated internationally. It may be difficult for traditional institutions to provide a marketplace for such trading.

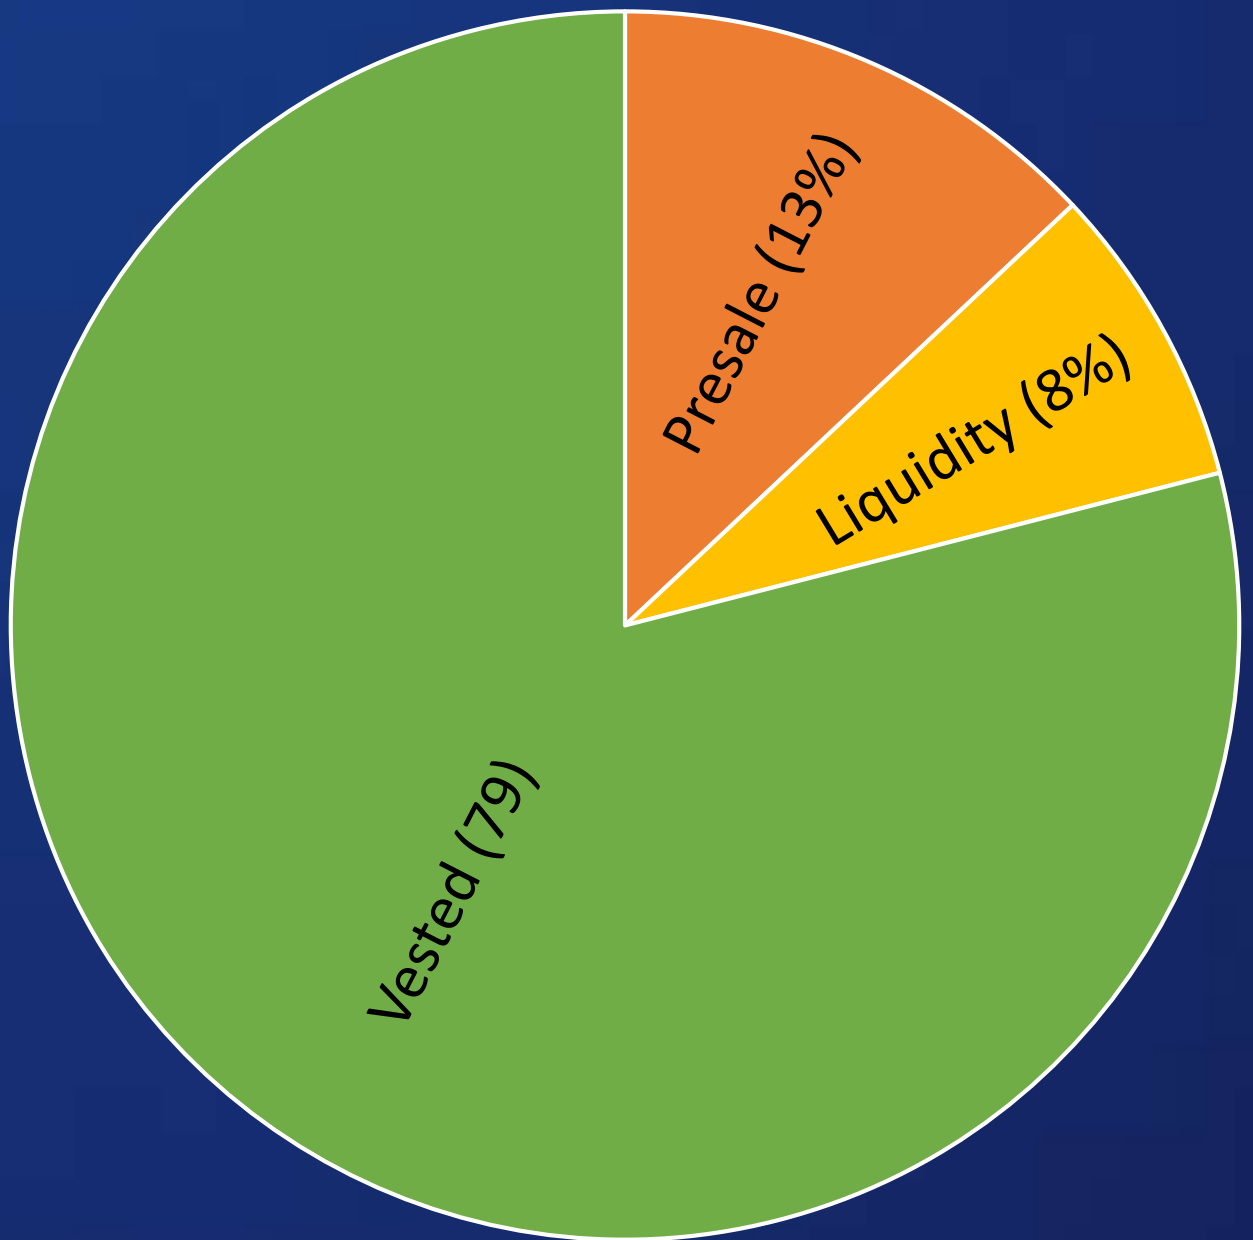

NFT can serve as a transactional 'entity' for digital art by mapping the file of a certain digital artwork, making it a perfect digital art carrier. In today's market, we are seeing NFT being combined with digital art, creating a new business model where NFT is traded as the digital artwork itself. In such trading, NFT is not only traded as copyright or ownership, but also serves as a unique link between the artist and the collector. NFT is what the artist acknowledges to be the essence of his work.

In the past, an artist was only paid once when his work was sold by him for the first time. When his work changed hands again and was sold for an exorbitant price, the artist couldn't benefit from it. NFT has changed the situation by offering digital artists the special right to profit from their work when it is sold for the second time.

# Tokenomics

- Name: CatEarth
- Symbol: CEC
- Network: Binance Smart chain
- Total Supply: 99,999,999,999  
(1 less 100Billions)

## Total Coins Distribution

Contract Address:

0xD9C0334183ac7c73c957EE7f99aA97d3FCa6Ffb5

# Taxation

## 1% for Marketing

Promoting Our Project and Game

## 2% BUSD Rewards

The strong holder will be rewarded.

The more you hold the more you earn!

Total Tax 3%

# Roadmap

## Phase 1

Launch Website

Creating Blockchain on BSC

Start Building Community

Audit

Presale

PanCakeSale Listing

Huge Promotion

Profit Sharing Site Launch

## Phase 2

Android Game (For Big Reach)

Adding Coin Logo in Trust and MetaMask

Aggressive Promotion

Grow the Community

Listing on Coinmooner and Coinsnipper

Listing on CMC and CoinGecko

Listing on Cex

AirDrop

# Cat Year (2023)

Listing on major Exchanger

Blockchain Game Release

NFT Mint Presale

NFT Public Minting

NFT Marketplace

Listing on Other Exchanges
